

Date: **August 29, 2023**
Addendum No. **One**

TO ALL PLANHOLDERS:

The enclosed addendum amends the documents for the above referenced Project:

1. **QUESTION:** Can you clarify the scope extent? Specifically, is the RFP requesting a proposal to develop seismic exploration activity planning? Most of the RFP's description is directed at permitting support services, but there is an inclusion of a deliverable for providing a 3D seismic program and plan of operations. My firm (ABR, Inc) is well positioned to provide permitting support, including completing any needed baseline scientific surveys. However, we do not develop oil and gas seismic operations plans, but would be able to directly work with any AIDEA-selected seismic contractors?

ANSWER: *AIDEA is looking for a service provider that can meet the qualifications specific to the Lease Stipulations and Required Operating Procedures pursuant to the ANWR Section 1002 leases that AIDEA holds concerning the preparation and submission of permit applications to commence a seismic future seismic program. AIDEA is not looking for, at this time, a company to perform the actual seismic program.*

The permit application SOW may also include those State of Alaska leases that may be available in the future.

These leases are depicted here: specifically leases 62 through 67:

END OF ADDENDUM

We appreciate your participation in this solicitation.

Sincerely,
Daniela Patterson
AIDEA Contracting Officer
