RE:NOTIFICATION

RFA 21107

ELECTRIC VEHICLE DIRECT CURRENT FAST CHARGING NETWORK PROGRAM, REQUEST FOR APPLICATIONS TO SELECT FAST CHARGING SITES

EMAIL TO: All RFA recipients on record.

It has been brought to our attention that on at least one occasion a vendor has presented inaccurate or misleading information regarding the equipment, warranties or operational capability of another vendor. While we believe that site hosts should only deal with authorized equipment vendors directly and not rely on information presented by any unauthorized vendors, AEA does not approve of any vendor presenting misinformation regarding another vendor's line of equipment, warranties, operational capability, or costs. Site hosts should not trust representations about equipment unless the information is provided directly by the equipment manufacturer or its authorized vendor.

This is a reminder that all proposed equipment and services must be approved through the RFQ #21088 process before the equipment and services can be submitted through the RFA.

As the May 5, 2021 deadline for proposal submittal approaches, please provide timely responses to potential site hosts.

**END OF NOTIFICATION**

We appreciate your participation.

Sincerely,

A handwritten signature in blue ink that reads "Lois Lemus".

Lois Lemus,  
Contracting Officer
